EDUCATION

Software Engineering

Princess Sumaya University for Technology

09/2020 - Present

GPA 90/100

WORK EXPERIENCE

Web Developer Internship

Eduhax

12/2023 - 01/2024

Amman, Jordan

Achievements/Tasks

- I contributed to a legacy WordPress website and conducted testing for a React web app.

Full-Stack Developer Internship

Orange Jordan

07/2023 - 10/2023

Amman, Jordan

Tasks

- I worked in a collaborative team as a full-stack developer and constructed responsive, dynamic websites using HTML, CSS, and JavaScript with a PHP backend. I gained exposure to API integration, version control, and rigorous review processes, in addition to quality assurance assessments.

PERSONAL PROJECTS

Personal Portfolio Website

My portfolio website, made in **React**. I was introduced to **react router**, state management, **component-based architecture** and **API** integration. With great focus on **user** experience.

Seminar Website

A **responsive** seminar website. Coded in **HTML**, **CSS** and **Bootstrap**. Used grid layout and **media queries** to maintain a good design on multiple screen sizes.

Business Website

An interactive business website. Coded in **HTML**, **CSS** and **Bootstrap** framework.

Login Page in React

A login page with a simple interface design. Coded using **React** and a **firebase** backend.

Android Trivia App in Java

An **android** trivia app with multiple categories of questions and a user-friendly interface. Uses the open trivia database <https://opentdb.com/>. **API**, deals with **JSON**.

2D Delivery Game in Unity

"**Delivery Dash**" is a 2D delivery game developed in **Unity** using **C#**. With its simple graphics, players are expected to pickup and deliver packages in a neighborhood avoiding obstacles.
